

September 18th–20th, 2018

First truly
continuous drying

UNIQUE
CONTINUOUS
MANUFACTURING

Workshop on Continuous Pharmaceutical OSD Production
From Powder to the Coated Tablet

Why Attend?

Participants will take an active part in the continuous production of tablets, operating the following processes including semi-continuous coating:

- Continuous direct compression
- Continuous dry granulation
- Continuous wet granulation
- **And as a highlight:**
The first truly continuous drying in the market

Workshop on Continuous OSD Pharmaceutical Production: September 18th–20th 2018

Our workshop will be offering a practical and theoretical introduction to continuous processing of oral solid dosage formulations. It will take place in our Technology Center at the state-of-the-art modular continuous production line QbCon® in Ennigerloh, Germany. Experience our unique unit as it facilitates continuous tablet production via direct compression, dry and wet granulation.

Topics:

- Continuous direct compression and dry granulation / roller compacting
- Continuous wet granulation and as a world novelty truly continuous drying
- Truly continuous granulation and drying in R&D-scale
- Transfer from batch processing to continuous manufacturing

More information about the program announced soon.

Who should Attend?

- Engineers, researchers, operators and decision makers with background in the pharmaceutical industry, academia or regulatory bodies.
- If you are operating in batch today – no problem. The workshop considers the future of OSD-processing within the pharmaceutical industry.

Procedure and Conditions

Every day will feature an interactive mixture of practical hands-on demonstrations of one dedicated production route, each, and lectures from experts in this field.

Rates: 985,- € (excl. VAT)

QbCon®

Speakers*:

Prof. Dr. Peter Kleinebudde, Düsseldorf University

Giustino Di Pretoro, Ph.D., Janssen Research & Development

Bernhard Meir, Gericke AG

Dr. Johannes Stelzner, KORSCH AG

Dr. Robin Meier, L.B. Bohle

Dipl.-Ing. Andreas Altmeyer, L.B. Bohle

* further speakers will be published soon

Quotes from the last workshop:

"It was a very good combination of practical sessions and lectures."

"The proportion of practical units was considerably bigger than in competitors' workshops."

"Very good content. I like the diversity of speakers and topics."

"The demonstration of running continuous manufacturing unit QbCon was very interesting."

"High qualified speakers. All questions were answered very detailed."
